RESOLUTION.

Read—

Notification in the Department of Finance and Commerce, No. 1354, dated the 14th March 1860.

Notification in the Home Department, No. 1902-(Sanitary), dated the 14th October 1910.

Schedule A to Notification No. 94-E., dated the 16th March 1886.

As a result of the enquiries set on foot after the loss of the "Titanic" the Board of Trade made a comprehensive revision of the scale of boats and life-saving appliances to be provided on board ships in the United Kingdom and appointed Committees of experts to deal with collateral questions arising in the same connection.

Meanwhile the maritime Local Governments have been consulted as to the necessity for revising the rules which govern vessels in British India, particularly those under the Native Passenger Ships Act, 1887, the Pilgrim Ships Act, 1895, and the Indian Emigration Act, 1908, which are read in the notifications detailed above. The replies show that, while revision is undoubtedly necessary, there is great divergence of opinion as to the extent to which it is required and the lines on which it should proceed.

The subject is one of considerable difficulty and complexity involving a number of technical and other questions which need careful scrutiny. The Government of India have therefore decided to appoint a Committee representative of official and non-official interests which will enquire generally into the sufficiency of the existing rules and report its views to Government. The Committee will consist of the following President and Members :—

PRESIDENT.

Mr. C. G. Todhunter, I.C.S., Collector, Madras Presidency.

MEMBERS.

The Hon'ble Sir Fazulbhoy Currimbhoy Ebrahim, *Kt.*, Bombay.
Commander C. J. C. Kendall, D.S.O., R.I.M., Port Officer, Calcutta.
Mr. W. H. Ogston, Partner, Messrs. Killick, Nixon & Co., Bombay.
Captain P. de St. Croix, Marine Department, British India Steam Navigation Company, Calcutta.

The Committee will meet at Bombay on the 10th November next and will subsequently visit such principal ports and make such enquiries as may be necessary. It will submit its report to the Government of India on the 1st March 1914. The report will be accompanied by drafts of the rules which it recommends for adoption.

The Government of India trust that Local Governments and Administrations will afford the Committee all the assistance which it may require, and will comply with any requests for information and advice which it may address to them.

Fort St. George, November 12, 1913.

No. 79.—The following rules laying down the procedure for collecting dues on cargo landed at the port of Madras from vessels in distress will be added as clause 20 in the statement of services attached to the Port Trust's schedule of harbour dues and services, published in notification No. 69, dated 29th November 1912, on pages 1191—1198 of Part I of the *Fort St. George Gazette*, dated 3rd December 1912 :—

"20 (*a*) All cargo to pay import harbour dues on landing except such cargo as may already have paid export harbour dues at Madras and may not have been carried to its destination.

(*b*) All cargo to pay *cranage* both in and out and *storage* while on the Trust's premises, at the usual rates

(c) Cargo found sound, and re-shipped without having left the Trust's premises, to be exempt from further export harbour dues.

(d) Where marks are indistinguishable and the cargo is landed in bulk, or under such conditions that the tonnage is not readily ascertainable, the licensed carrying capacity of the barge that brings the cargo to shore to be taken as the tonnage, a proportionate reduction being made for half loads. Where marks are indistinguishable and the cargo is landed direct on to a quay in bulk or under such conditions that the tonnage is not readily ascertainable, the measurements to be made by actual cubical contents at 50 cubic feet to the ton."

In all cases where permission has been granted, the memorandum or letter permitting the change should be produced for the satisfaction of the Superintendents.

REVENUE NOTIFICATIONS.

NOTIFICATION.

No. 15.—Whereas it has been found necessary to take steps to control the preparation, possession and sale of denatured spirits in the Madras Presidency, the following rules have been framed by the Board of Revenue under sections 6, 11, 12, 13, 15, 17, 24 and 29 (*a*) of the Madras Abkári Act I of 1886 as amended by Madras Act I of 1905 and Act I of 1913, in supersession of the rules contained in Notification No. 10, dated 7th May 1913, published on pages 370–373 of Part II of the *Fort St. George Gazette*, dated 10th June 1913:—

1. Denatured spirit is spirit rendered effectually and permanently unfit for human consumption by the admixture of light cœutchouccine and crude pyridine bases wholly made from a mineral source as per specifications appended, or wood-naphtha, or other special denaturants, approved of by the Board of Revenue.

2. Denatured spirits are liable to a duty of 3 per cent. *ad valorem*: the duty being calculated on the declared issue price of each consignment at the distillery, less the discount, if any, allowed to purchasers and the duty. Distillers should, when applying for a permit, declare the sale price of the spirit at the distillery for the purpose of calculating the *ad valorem* duty.

3. Denatured spirit may be manufactured by holders of distillery licenses in the Presidency provided (1) that the light cœutchouccine and pyridine bases to be mixed with the spirit must first be tested and approved by the Board's Laboratory, (2) that they must be kept under lock and key by, and used under the supervision of, the distillery officer, (3) that they must be used in the proportion of ½ a gallon of light cœutchouccine and ½ a gallon of pyridine bases to 99 gallons of the spirit, and (4) that the spirit shall not be of less strength than 50 per cent. overproof. Similar conditions apply to the use of wood-naphtha, in the special cases where its use is permitted, with this difference that one part by volume of crude wood-naphtha of a strength not less than 50 per cent. overproof shall be mixed with nine parts of spirit and that the use of wood naphtha in a highly purified condition will not be permitted. The Board's previous sanction should be obtained in cases of special methods of denaturation for spirit intended for use in particular arts and manufactures.

4. Spirit denatured with light cœutchouccine and pyridine bases may be imported by sea, but samples must be submitted to the Board's Laboratory and there certified to be fully denatured before it can be removed from the custom-house. In the case of imports by sea from other Presidencies a certificate from the Collector of Customs at the port of shipment to the effect that the spirit has been fully denatured with light cœutchouccine and pyridine bases as laid down in rule 3, may be accepted in lieu of the Board's report. Spirit that is not sufficiently denatured must either be denatured afresh or must pay duty at the full tariff rate. Spirit treated with wood-naphtha or other special denaturants can be imported only with the special sanction of the Board.

4 (*a*). Spirit denatured with light cœutchouccine and pyridine bases may be imported from other Presidencies by land with the previous permission of the Collector, provided that the spirit to be imported has been fully denatured as laid down in rule 3 and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form M.S.—2 to be obtained from the Collector in each case. Spirits treated with wood naphtha or other special denaturants can be imported by land only with the special sanction of the Board.

5. Licenses (M.S.—1) for sale of spirit denatured with light cœutchouccine and pyridine bases will be issued by Collectors, free of fee, to respectable applicants on their showing that they have a legitimate demand for such spirit. All such applications should be forwarded to the Collector through the Inspector of the Salt, Abkári and Customs Department of the Circle in which the applicant wishes to hold his license. No such license will be issued to persons licensed to sell liquor for consumption on the premises.

6. The holders of M.S.—1 licenses may obtain their supplies of spirit from the custom-house or distillery on production of a written permission (M.S.—2) for the removal of the same from the Collector of the district in which the custom house or distillery is situated. Books of form of application for such permission (M.S.—2) will be supplied to them. These applications should be forwarded to the Collectors concerned through the Collector of the district to which the applicant wishes to transport the spirit. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit in quantities not exceeding 120 gallons at a time or from other M.S.—1 licensees up to a maximum of 20 gallons at a time on presentation of a requisition in form M.S.—8. The licensees are also empowered to sell spirit to one another and to holders of M.S.—1-a licenses up to a maximum of 20 gallons at a time. The transport of spirit thus sold should be covered by a permit to be granted by the seller in each case. Books of permits (M.S.—2) for the transport of the spirit to be obtained from holders of M.S.—1 licenses in quantities exceeding one gallon but not exceeding 20 gallons will be issued to holders of these licenses on application to the Collector of the district in which they carry on their business.

Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*a*) *supra*.

7. Varnish-makers and others requiring spirit denatured with light cœutchouccine and pyridine bases for use in their business, but not for sale, will be given special licenses (M.S.—1-*a*) on application, supported by evidence as to their requirements through the Inspector of the Circle, to the Collector of the district in which they carry on their business. They will be supplied by distillers or through the custom-house on presentation of a permit (M.S.—2) to be obtained from the Collector on application in form (M.S.—2). These licenses may also obtain their supply of spirit from a depot licensed for the wholesale vend of such spirit in quantities not exceeding 120 gallons at a time or from holders of M.S.—1 licenses up to a maximum of 20 gallons at a time. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*a*) *supra*.

8. Holders of M.S.—1 and M.S.—1-*a* licenses will, on application to the Collector of the district in which they carry on their business, be furnished with books of requisitions (M.S.—8) authorising

them to obtain spirit denatured with light caoutchoucine and pyridine bases in quantities exceeding one gallon but not exceeding 20 gallons at a time from holders of M.S.—1 licenses, and in quantities not exceeding 120 gallons from a depot.

9. Similar licenses (M.S.—1-b) will be given to Chemists and others who, for special reasons, require spirit spoiled with wood-naphtha. The procedure will be the same except that (unless the Board has given a special authority to import) the spirit will be obtainable only from local distilleries and that the licensees will be required to enter into a bond (M.S.—4) with the Collector undertaking to use the spirit for the purposes specified and no other. The forms to be used in this case will be M.S.—1-b, M.S.—2, M.S.—3. Persons holding these licenses will also be allowed to sell such spirit up to a maximum of one reputed quart at a time, on the use of it being ordered in writing by a competent medical man. Such orders are to be retained by the seller in his stock book until the latter is inspected by an Abkári officer.

10. A special license in form M.S.—1-c will be issued to the Railway Companies in the Presidency for the storage and use of spirit denatured with light caoutchoucine and pyridine bases and its distribution to such stations on their respective lines, as may be specified in the license, provided that the licensees enter into bond with the Collector undertaking to use the spirit for the purpose specified in the license and no other. The licensees may obtain their supplies of the spirit from the custom-house or distillery on production of a written permission (M.S.—2) to be obtained from the Collector of the district in which the custom-house or distillery is situated on application in form M.S.—3. The spirit may also be obtained from a depot licensed for the wholesale vend of the spirit up to a maximum of 220 gallons at a time on production of a requisition in form M.S.—3. Books of applications or requisitions may be had from the Collector of the district in which the license is held. The Railway Companies will be exempted from taking out separate licenses for individual stations for the possession and use of the spirit received from the M.S.—1-c premises. The transport of spirit should be covered by a permit (M.S.—9) to be granted by the licensees in each case. Denatured spirits may also be imported from other Presidencies by land subject to the conditions laid down in rule 4 (*c*) *supra*.

11. A special license in form M.S.—1-d will be granted to distillers, who are also manufacturers of denatured spirits, for the wholesale vend of such spirits, manufactured in their distilleries, not exceeding 120 gallons at one time to holders of M.S.—1 and M.S.—1-a licenses and not exceeding 220 gallons at one time to holders of M.S.—1-c licenses on production of a requisition in form M.S.—3. The transport of the spirit so issued shall be covered by a permit in form M.S.—9 to be granted by the depot-keeper in each case.

12. The customs or distillery officer or wholesale depot-keeper concerned will send an advice in form M.S.—5 of each issue of denatured spirit that he makes to the Inspector of the Circle to which the spirit is consigned. This advice must be sent promptly at the time of issue. No issue of more than 500 gallons at any one time to any one person is permitted from a custom-house or distillery. The same limit will apply to imports of denatured spirits from other Presidencies by land. Collectors who permit such imports should at the same time advise the Inspectors concerned of the permission granted by them for such imports, using the advice of M.S.—2 suitably amended.

13. Unlicensed persons are prohibited from selling denatured spirit, and from possessing more than one gallon at a time. The limit is fixed under section 13 of Act I of 1880. Breach of the rule will subject the offender to the penalties prescribed in the Act.

14. When insufficiently denatured spirit is again denatured under rule 3 *supra*, the importer will bear the expense.

15. The minimum strength at which imported and locally-made denatured spirit can be sold will be 50° over-proof.

APPENDIX.

OFFICIAL LABORATORY TESTS TO ASCERTAIN THE SUITABILITY OF SAMPLES OF LIGHT CAOUTCHOUCINE AND PYRIDINE BASES FOR DENATURING ALCOHOL.

Light caoutchoucine.

1. *Nature.*—By "caoutchoucine" is meant the liquid obtained by the dry distillation of vulcanised rubber. By "light caoutchoucine" is meant the liquid obtained by redistilling "caoutchoucine" and collecting that portion which passes over at or below about 200° C.

2. *The specific gravity of light caoutchoucine.*—The specific gravity of light caoutchoucine at 80° F. should be between 835 and 866 referred to water as 1·000.

3. *Boiling test.*—For the purpose of this test, 100 c.c. of light caoutchoucine should be redistilled in the pyridine testing flask (see specification for pyridine bases). Under these conditions not more than 15 c.c. of distillate should pass over at or below 109° C. whilst a total (including the foregoing) of at least 70 c.c. should pass over at or below 200° C.

4. *Absence of soluble constituents.*—When 25 c.c. of light caoutchoucine are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light caoutchoucine should show an appreciable diminution in volume.

5. *Neutrality.*—The aqueous layer obtained from test 4 should show no marked acidity or alkalinity when tested with both red and blue litmus paper.

6. *Limit of saturated hydrocarbons.*—At least 70 per cent. of the light caoutchoucine should be soluble in concentrated sulphuric acid. For testing this, 25 c.c. should be measured off into a tapped and stoppered separating cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid, the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 50 c.c.) for the high coloured layer to become quite fluid so that it can separate readily from the upper layer of unattacked constituents. After a final thorough shaking and cooling, the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then

tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after standing. It should finally measure not more than 7 c.c. The acid used should be of specific gravity 1·84 and may be of commercial quality.

V. *Freedom from water.*—Light caoutchouc should not contain any appreciable amount of water. Any officer engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel where the water, if present, will be found. For this purpose he should employ a syphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also assure himself that the sample is collected in a bottle free of moisture.

Pyridine bases.

I. Colour.—The colour must not be darker than that given by two cubic centimetres of decinormal iodine solution dissolved in one litre of distilled water.

II. Miscibility with water.—20 c.c of the pyridine bases should give a clear mixture with 40 c.c. of water; or else a mixture only so slightly opalescent that, after standing for five minutes, ordinary newspaper type is clearly visible through a layer 15 c.m deep

III. Amount of water present.—From 20 c.c. of the pyridine bases mixed with 20 c.c. of caustic soda solution (density 1·4), at least 18·5 c.c of the bases should separate, after having been repeatedly shaken together and allowed to stand

IV. Titration.—Dissolve 1 c.c. of the pyridine bases in 10 c.c. of distilled water. Titrate with normal sulphuric acid until a drop of the mixture gives a definite blue spot on congo red paper (the blue colour should at once disappear). At least 10 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prepare the congo-red paper, dissolve one gram of congo-red in one litre of distilled water. Soak filter paper in this and then dry.)

V. Cadmium chloride reaction.—Vigorously shake together 10 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent. solution of dry fused cadmium chloride. A distinct crystalline precipitate should immediately result.

VI. Boiling-point.—Distil 100 c.c. of the pyridine bases in the manner described below. At least 90 per cent. should distil over at or under 140° C.

Method.—100 c.c. of pyridine bases are placed in a short-necked copper flask of about 200 c.c capacity. The flask is arranged on an asbestos card which has a circular hole of 30 m.m. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 13 m.m. wide and 170 m.m. long, provided with one bulb) of which the side-tube (issuing 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 480 m.m. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to 5 c.c. per minute, the distillate being received in a graduated glass cylinder. At least 90 c.c. should distil over at or under 140° C. at a barometric pressure of 760 m.m.

If the barometer varies from 760 m.m., a correction of 1° C. for each 30 m.m. of variation should be applied (*e.g.*, under 770 m.m. of pressure 90 c.c. of distillate should come over at or under 140·3°C., whilst under 750 m.m. the same amount of distillate should come over at 139·7°C.).

NOTE.—Pyridine proper is a single definite compound (C_5H_5N) boiling at about 115° C. Pyridine bases are mixtures of pyridine with closely allied compounds boiling at various temperatures. They are cheaper and more effective denaturants than the pure pyridine.

STATEMENT OF OBJECTS AND REASONS.

The Bill is intended to introduce into the Madras Estates Land Act, 1908, certain amendments suggested by the Madras Landholders' Association, or by other persons, or by local officers in their annual reports on the working of the Act.

The amendments proposed in clauses 9, 11, 12, 15 to 20 and 23 are intended to make the meaning of the Act clear and to remove doubts and ambiguities.

Clauses 4, 10 and 22 represent consequential alterations with reference to clauses 3, 8 and 13, respectively.

The object of the remaining amendments is briefly explained below:—

Clause 2.—The repealed Act VIII of 1865 did not apply to the scheduled districts in the Ganjam district and it has also been ascertained that the tenures prevailing there do not admit of the relation of landholder and ryot as contemplated in the Estates Land Act. It has therefore been decided to exclude these tracts from the operation of the Madras Estates Land Act I of 1908.

Clauses 3 *and* 8.—Trees are now excluded from "Holdings" and the effect is that though tree-tax was in some cases included in the assets on which the peshkash was calculated the landholders are denied the advantages of the summary process provided by the Act for recovering this income. The policy of the Act is to discourage separate pattas for trees as distinguished from the land and to recognize or create rights in favour of the ryot to all trees in his holding subject to certain limitations. But where trees are held on patta independently of the land, it is necessary to allow the landholder to recover the rent of trees in the same way as the rent of land and also to prevent such trees from being cut down by the ryot without the permission of the landholder.

Clause 5.—There is no specific provision in the Act regarding lanka lands. It is doubtful whether in all cases they would fall under the head of "old waste." The justification of the recognition of permanent occupancy rights in the case of ordinary ryoti lands, that they have been held as such from time immemorial, cannot apply to newly-formed lankas. The Government have therefore decided, following section 180 (1) of the Bengal Tenancy Act, to provide that twelve years' continuous occupation should be required as a condition precedent to the acquisition of occupancy rights.

Clause 7.—The present wording of the saving clause to section 20 has led to an impression that the landholder is at liberty to interfere with tank-beds. The present Amendment is intended to make it clear that the use of tank-beds for purposes other than those allowed by the custom of the village is prohibited.

Clause 8.—It is proposed to make it clear that retrospective effect should not be given to commutation. Otherwise as experience shows the ryot is encouraged to withhold all payment pending the final disposal of the suit and the consequences are disadvantageous to both the landholder and the ryot.

Clause 13.—Under the Act jodi payable by an inamdar is not rent and is therefore not recoverable by process under the Act or by suit in a Revenue Court. The landholder has to resort to the civil court. The High Court have besides recently held that a proprietor cannot under the Estates Land Act distrain the property of an intermediate landholder in spite of the provision in section 74 of the Local Boards Act of 1884. On a representation of the difficulty experienced in the collection of jodi, poruppu, etc., and assam, the Government have thought it desirable to allow suits to be filed in revenue courts in these cases.

Clause 14.—Section 79 (2) as it stands seems to require that a copy of the demand and of the list of property should be served on or delivered to the cultivator even in cases where the property attached is not the "crop". It is proposed to make this point clear.

Clause 21.—Section 100 (1) authorises the deduction from the sale-proceeds of moveable property of one anna in the rupee on account of the costs of sale credited to Government; no similar provision is made in section 127 in respect of the sale of immoveable property. The defect is proposed to be rectified.

Clause 24.—Section 75 requires that on receipt of an application under section 74 the Collector shall issue a notice to the other party, but under section 192 (*b*) applications under section 74 may be disposed of without a notice. It is proposed to remove the inconsistency.
